

MEDICAL STATEMENT

Police Officer Assigned as Mounted Patrol Officer Chicago Police Department

All members seeking assignment as a Police Officer Assigned as Mounted Patrol Officer must be able to safely participate in testing and training to successfully reach a minimum level of proficiency. No member may participate further in the selection process who, for any reason, is not able to function as a Police Officer Assigned as Mounted Patrol Officer, or participate in the relevant training. Any member assigned as a Police Officer Assigned as Mounted Patrol Officer as a result of this selection process who, for any reason, is no longer able to function will be reassigned. Your completion of this form is required to participate in the selection process.

Answer all of the questions below. A positive response to a question does not automatically disqualify you. A positive response means that there is a pre-existing condition that may affect your safety and ability to carry out the training and functions. Therefore, you **must** seek the advice and approval of your physician and have them complete the **physician consent form** prior to engaging in any related activities. Even if you answer **no** to all questions, you must still seek your physician's approval and have them complete the Physician Consent Form to ensure that you have no recent medical conditions that, unbeknownst to you, may prevent you from engaging in any training and/or activities. If you suffer from substance abuse, alcohol or drug, you must discuss this condition with your physician and seek and follow your physician's advice with regard to determining your suitability to participate in Mounted Unit training and/or activities. A drug screening will be administered to all candidates selected for the training program. Failure to comply with any part of the application process will result in an applicant's immediate disqualification.

Are you pregnant ?	YES	NO
With the exception of birth control or anti-malarial, do you take prescription medication(s)?	YES	NO
